MICROPROCESSORS AND MICROSYSTEMS

Index to Volume 17 (1993)

No 1 pp 1–56
No 2 pp 57–112
No 3 pp 113–192
No 4 pp 193–256
No 5 pp 257–312
No 6 pp 313–368
No 7 pp 369–440
No 8 pp 441–504
No 9 pp 505–568
No 10 pp 569–640

Article index

Number 1

Special Issue: Safety-Critical Systems
Guest Editor: Professor John Cullyer, Lucas Professor of Electronics, University of Warwick, UK

Risk and system integrity concepts for safety-related control systems
R. Bell and D. Reinert 3
Computer software in civil aircraft
J. P. Potocki de Montalk 17
The special problems of military systems
J. Kershaw 25
The industrial use of formal methods
M. Thomas 31
The development of safe advanced road transport telematic software
P. H. Jesty, T. F. Buckley and M. M. West 37

Number 2

Using parallel processing to achieve real-time access to a large terrain database in an airborne environment
J. R. Vaughan, G. R. Brookes, M. A. Fletcher and D. P. M. Wills 59
Reconfiguring the boundaries of a mesh-connected array of processors with run-time programmable logic
R. Cucchiara, T. Salmon Cinotti, G. Neri and G. Rustichelli 67
A fault-tolerant multi-transputer architecture
R. Krishna Kumar, S. K. Sinha and L. M. Patnaik 75
Modula-2 based multitasking environment for a flexible biprocessor controller
G. Godena and J. Petrovčič 83
PARTER: a parallel system for texture recognition
S. A. Karkanis and C. Metaxaki-Kossionides 93
FDDI dual attachment station on a PC-AT interface card
M. R. Mahavadi 101

Number 3

Special issue: Persistent Object Systems
Guest Editor: Professor John Rosenberg, University of Sydney, Australia

Architectures for persistence
G. Russell and P. Cockshott 117
A novel architecture for handling persistent objects
S. H. Lavington 131
A model for security and protection in persistent systems
J. L. Keedy 139
Distributed persistent stores
F. A. Henskens and J. Rosenberg 147
Using persistence to support incremental system construction
A. Dearle, Q. I. Cutts and R. C. H. Connor 161
Mechanisms for controlling evolution in persistent object systems
R. Morrison, R. C. H. Connor, Q. I. Cutts, G. N. C. Kirby and D. Stemple 173
Persistent system architectures: a comparison
M. Reitenspieß 183

Number 4

Special feature: Papers from the Seventh Symposium on Microcomputer and Microprocessor Applications, μP '92, held 22–24 April 1992 in Budapest, Hungary.

A C++ language interface for parallel programming
T. Ungerer 195
Hardware support for error detection in multiprocessor systems – a case study
W. Hohl, E. Michel and A. Pataricza 201
Methodology of real-time system design using multiprocessors
L. Zhang, M. Galindo, D. Marquie and Y. Raynaud 207
Image recognition problems of fingerprint identification
E. Nikodémusz-Székely and V. Székely 215
Honey qualification – an application of the ARGUS image processing system
I. Cseke, Z. Fazekas and T. Holka 219
Precision 3-D motion analysis system for real-time applications
E. H. Furnée and Á. Jobbágy 223

Automated synthesis of asynchronous interface circuits
L. Lavagno and A. Sangiovanni-Vincentelli 232
Election and symmetry breaking in synchronous general networks
M. Y. Chan 243
EMI-induced failure in microprocessor-based counting
H. K. Tang and M. H. Er 248

Number 5

Special issue: Boundary-scan testing
Guest Editor: Colin Maunder, Emeritus Chair, IEEE 1149.1 Working Group

Testability on TAP
C. M. Maunder and R. E. Tulloss 259
Case study of 1149.1 microprocessor implementations
W. C. Bruce, M. G. Gallup, G. Giles and T. Munns 267
Boundary-scan design for cost-sensitive applications
P. Harrod 277
Testability guidelines for multichip modules
K. E. Posse 281

A structured approach to board-level BIST using the boundary-scan master
N. Jarwala and C. W. Yau 289
An economic, hands-on start to boundary-scan testing
H. Bleeker 299

Number 6

Animation prototyping of real-time embedded systems
J. E. Cooling and T. S. Hughes 315
Neural chip for fast pattern matching
E. Franzi 325
Rotation, scale and translation invariant template matching on a transputer network
G. Hall and A. Matias 333
Transputer-based feature extraction and shape analysis
P. Netherwood, P. Forte and P. Barnwell 341
A parallel reconfiguration algorithm for WSI/VLSI processor arrays
J. H. Kim and K. Efe 353
Optimal algorithms for the many-to-one routing problem on two-dimensional meshes
F. Makedon and A. Symvonis 361

Number 7

Special section: Field Programmable Gate Arrays Part One: Introduction to the Technology

Survey of field programmable logic devices
T. A. York 371
FPGA design technology
V. J. Coli 383
VHDL and synthesis tools provide a generic design entry platform into FPGAs, PLDs and ASICs
C. Jay 391

A novel flow control and switching strategy for preventing hotspot congestion in multistage networks
A. Pombortsis and I. Vlahavas 403
Oberon-2 in Windows: what price compatibility?
B. R. Kirk 411
Static instruction scheduling for the HARP multiple-instruction-issue architecture
S. M. Gray, R. G. Adams, G. J. Green and G. B. Steven 415
STi 3220 motion estimation processor
A. Richardson and M. Querol 425

Number 8

BACH: a hardware monitor for tracing microprocessor-based systems
K. Grimsrud, J. Archibald, M. Ripley, K. Flanagan and B. Nelson 443
Parallel DSP system integration
A. Ledeczi, B. Abbott, C. Biegl, T. Bapty, G. Karsai and J. Sztipanovits 460
A list scheduling anomaly
S. Selvakumar and C. Siva Ram Murthy 471
Built-in self testing of communications systems using ASIC technology
F. Novak, N. Sutanovac and R. Trobec 475
A practical design method for instruction decoder PLAs for microprogrammed controllers
H.-H. Kim, S.-H. Hwang and C.-M. Kyung 481

Number 9

FFT – fRISCy Fourier transforms?
M. R. Smith 507
A development environment for rapid prototyping of user applications on distributed memory multiprocessor systems
P. K. Das, B. Nag and P. Das 522
Using transputers in a TCP/IP environment: the PCserver approach
L. Rizzo 529
V-P cache: a storage efficient virtual cache organization
S. L. Min, J. Kim, C. S. Kim, H. Shin and D.-K. Jeong 537
Line fetch/prefetch in a stack cache memory
L. Lopriore 547
Dual-DSP system for signal and image processing
K. Rajan, K. S. Sangunni and J. Ramakrishna 556
MS160 ultra fast non-numeric coprocessor
E. Stephansen 561

Number 10

A correlation coprocessor for accurate real-time ultrasonic ranging of multiple objects using the transputer
M. Brunfaut, H. Peremans, K. Audenaert, R. Blomme and J. Van Campenhout 571
A generalized addressing scheme and command message for PC-based SCADA applications
C. Y. Teo, O. Chutatape and C. H. Tan 578
The efficiency of computational procedures for recursive digital filters
R. M. Goodall and M. G. Goodall 587
Data acquisition system based on the T800 transputer for the PC-bus
C. Allen, R. Booth and S. McConnell 597
A constant time algorithm for finding maxima on reconfigurable bus systems using fewer processors
C. S. R. Krishnan and C. S. Ram Murthy 607
Real-time parallel processing implementation for word recognition using MLP and HMM
Y. Arriola and R. A. Carrasco 611
Design and implementation of an EPROM emulator as a low-cost microprocessor development tool
Y. Liu and G. Showalter 627
